Desktop search is must have application for mobile professionals, government employees and executives!

Your BlackBerry provides you with unprecedented mobility and communication. Would you like to do more through your device and leave that laptop behind? Does this describe you?

- Your corporate or government security policy requires you to delete incoming email and content from your BlackBerry as it is received.
- Your email flow exceeds the ability of device to store it and needed messages or attachments get overwritten.
- You continually ask co-workers to resend you key emails and documents when you are out of the office.
- You are ready to walk into a meeting and just wish you could grab a file off your desktop from your BlackBerry.

WebMessenger Mobile Adaptor for Desktop Search is a break though technology that that gives you unprecedented, remote, and secure access to your desktop content from your BlackBerry. WebMessenger Mobile Adaptor for Desktop Search lets you take virtual gigabytes of files, emails and attachments with you. You'll never be without the information that you need again!
